DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Wednesday, 01 September 2021 at 05:51 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are forecast to remain Low as the north to northeasterly breeze across much of the UK continues to bring clean air across the country and prevent the buildup of locally sourced pollutants.

Tomorrow: Little change in the weather conditions with Low levels of air pollution expected to persist across the UK on Thursday.

Outlook: As winds become more easterly or southeasterly the odd pocket of Moderate air pollution is possible across southern England. Otherwise Low levels expected.
